<b>OPTIONS</b>	TB Conveyors; Satori Bulk Mailer Software
<b>DUTY CYCLE</b>	30 million pieces total or 500,000 per month over a 5-year life cycle

PRELIMINARY SPECIFICATIONS SUBJECT TO CHANGE WITHOUT NOTICE

Digital color is great for your business. It gets attention, it delivers revenue, it increases response, it makes money for you. Up until now, it has also come at a high price. Either the hardware investment was sky high, or the ongoing supply costs were eating profits. Inkjet offered the solution to both, but was painfully slow. It's time for a technology breakthrough - a revolutionary one.

Well that time has come! Introducing the RENA Mach 5 Digital Color Printer featuring unprecedented digital Memjet® technology. How unprecedented? The Mach 5 has a single, fixed printhead that has over 70,000 nozzles producing brilliant graphics at 1600 dots per inch and print speeds up to 12 inches per second.

Not only is the new RENA Mach 5 a productivity boosting machine - it's also extremely cost efficient. The five ink tanks hold 250 ml of ink for long job runs and low cost per piece. Compared to existing systems, we can run 3 times longer on a set of ink tanks that cost substantially less than toner. All without any fragile drums or fusers to replace. It's a tremendous profit center that will improve your business dramatically.

Like all RENA products, it is precision engineered and its all metal construction is built to last for years of reliable production.

Contact your local RENA Systems dealer today and schedule a no-hassle quote and live demonstration

## KEY FEATURES

- Print in brilliant full color at industry leading 1600 x 1600 dots per inch exclusive Memjet® technology
- Operates at speeds up to 9,000/hr for unmatched color throughput
- Automated cartridge maintenance system keeps print quality perfect
- Class leading cost per piece makes it a more profitable system
- Industrial inks are designed to print on a wide variety of paper types, including coated stocks
